

ADJUSTABLE PALLET RACKING

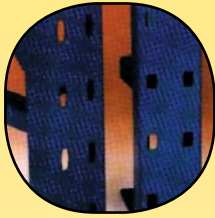

Ashford manufacture a vast range of static, racking systems either to Ashford specifications or tailor made to suit customer requirements.

The welded Series 75 louvre 2-part pallet storage system gives maximum rigidity and has an integral beam safety-locking tab on the connector. Ashford also produce various bolted racking systems. All systems are fully adjustable and have add on capability both in length and height. Ashford also offer drive-in and mobile racking systems.

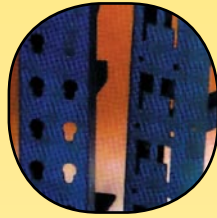

A full range of accessories are available e.g. Clip over decks, drum supports, backstop and bumper beams, back-to-back ties and timber decks.

Loading capacities are specified on consultation with our sales and marketing division.
