

MULTI-RACK

A modular system which provides the facility of garment hanging, flat pack storage and bulk carton storage all in one unit. The Multi-Rack System adapts easily to growth or changing patterns of stock location.

Versatility

Shelf storage and garment hanging can be provided at the same level within any module but totally independent of each other.

Rigidity

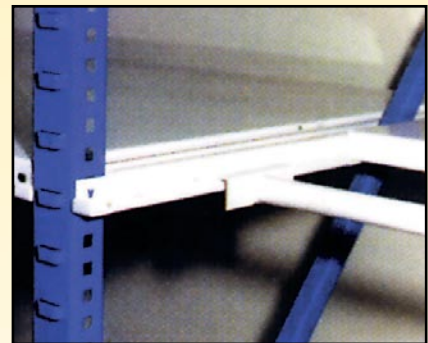

Positive location of support beams and the robust design of the welded frames ensure a completely rigid structure without the need for cross-aisle ties or braces.

Adjustability

All storage levels are independently adjustable on a 25.4mm vertical pitch - thus maximising available space.

Simplicity

No nuts and bolts required - only six component parts fulfil all the options. Ashford Multi-Rack is readily available and manufactured in South Africa. For any further information about Multi-Rack contact Ashford on the following numbers.
